

Consider HSS for your hip replacement

# Hip Replacement Scorecard

HSS

HSS has developed a new tool called the **Hospital Reliability Scorecard**. The tool features five factors that are important to consider when choosing the best hospital for your needs, so you can better evaluate your options.

This scorecard provides data specific to hip replacement at HSS. But you can ask any hospital for this data, no matter what surgery you need.

## Why the 5 factors of reliability are important

Not all hospitals are the same. Some are more reliable than others. And this difference can increase the chances that you'll experience a setback, such as a complication in the hospital or something else that happens once you're home. The five factors can help you protect yourself from these avoidable risks. Find out which data to ask for and learn why the five factors matter to your health.

**Success Rate** 🚩

**98%** <sup>1</sup>

Out of 214 responses, 100% response rate

Of HSS patients **reported improvement** **within 12 months** after their treatment

**Complications** +

**1.8%** <sup>2</sup>

HSS In-Hospital Complications

**vs.**

**2.4%** <sup>2</sup>

National Rate

Represents hip/knee replacement care. Lower is better.

**Avoidable Hospital Visits** 🛡️

**2.5%** <sup>2</sup>

HSS Readmissions

**vs.**

**4%** <sup>2</sup>

National Rate

Represents hip/knee replacement care. Lower is better.

**Procedure Volume** ▲

**5,170** <sup>3</sup>

Knee replacements per year, that's **254% more** than the next leading hospital

**Patient Experience** ★

**91%** <sup>2</sup>

Of patients **would recommend HSS**

Over the national average of **72%**

---

★★★★★

**4.8** out of **5**

Based on **18,491** patient ratings

### The five factors of reliability

Ask your hospital for this information. The data will be different for each hospital you're comparing.

#### 🚩 Success Rate

Tracks whether patients report feeling better one year after treatment. *Higher is better.*

#### ★ Patient Experience

Would patients recommend this hospital to others? *Higher is better.*

#### + Complications

Shows how often patients develop medical problems while in the hospital. *Lower is better.*

#### 🛡️ Avoidable Hospital Visits

Shows how often patients need to be re-hospitalized after their initial treatment. *Lower is better.*

#### ▲ Procedure Volume

Practice makes perfect. Seek out a hospital with lots of experience doing this procedure. *Higher is better.*

### About hip replacement

#### What

Surgical procedure in which damaged cartilage in the hip is replaced by a metal implant. Also called "hip arthroplasty" or "hip resurfacing."

#### Where

Takes place in a hospital or ambulatory surgery center.

#### Length of Hospital Stay

Ranges from less than one day to several days, depending on the complexity of the procedure and your overall health.

### Testimonials

"If there is anyone who can restore your lifestyle and give you your life back, this is the doctor."

Ennett, Hip Replacement

### Endorsements

HSS has ranked U.S. #1 in orthopedics since 2010

A comprehensive comparison tool

# Hospital Reliability Scorecard

It's important to make informed decisions about your care. The following questions were designed to help you better understand the differences in how well a hospital performs your procedure for so you can avoid unnecessary risks. Ask your provider for this data. Much of the data is also available at [www.medicare.gov/care-compare](http://www.medicare.gov/care-compare)
